Vistop 32, 63 and 125 A 1000 V DC isolating switches

4142 81/82/83

## 1. GENERAL CHARACTERISTICS

### 1.1 Description - Usage

- Safety isolating switches with visible load breaking and positive contact operation. Double break on each pole by self-cleaning snapaction make/break contacts.
- Isolation of electrical circuits from the DC supply.

This isolating switch is suitable for photovoltaic applications.

Technology: 2-pole (+/-), in series, connected by a shunt cable - Symbol:

$$
\underbrace{1}_{2}
$$

1.2 Range

|  | $\mathbf{4 1 4 2 8 1}$ | $\mathbf{4 1 4 2 8 2}$ | $\mathbf{4 1 4 2 8 3}$ |
| :---: | :---: | :---: | :---: |
| Nominal <br> current <br> (In) | 32 A | 63 A | 125 A |
| Nominal <br> voltage <br> (Un) | 1000 V DC | 1000 V DC | 1000 V DC |
| Number of <br> 17.5 mm <br> modules | 9 | 9 | 9 |

- Black front handle, direct or external (with faceplate) with Cat. No. 227 32, to be ordered separately
- Label holder for identification
- Screw fixing or rail mounting on EN/IEC 60715 or DIN 35 symmetrical rail by bistable claws (lockable)
- Connection via cage terminals with screws tightened by Allen key (32 to 125 A)
- Option to add an auxiliary 2-pole 16 A isolating switch and 1 or 2 NC + NO auxiliary contacts (for AC only)

5. Technical characteristics ..................... 2
6. Accessories

Catalogue number(s) : 4142 81/82/83
2. DIMENSIONS

Vistop 32, 63 and 125A 1000 V DC isolating switches

## 3. SETUP

### 3.1 Positioning

Position in the installation:
a) Near the panels:

b) Near the inverter:

Positioning for operation:
. Vertical, horizontal or on its side:

## Power supply:

. From the top

. From the bottom

### 3.2 Connection - Recommendations

- Connection via cage terminals with screws tightened by 4 mm Allen key ( 32 to 125 A DC)
. Recommended stripped length: 18 mm
. Recommended tightening torque: 6 Nm
3.2 Connection - Recommendations (continued)

Permissible cross-sections (S):
Conductor material:
Copper only
$4 \mathrm{~mm}^{2} \leq \mathrm{S} \leq 50 \mathrm{~mm}^{2}$
$4 \mathrm{~mm}^{2} \leq \mathrm{S} \leq 50 \mathrm{~mm}^{2}$
. Use of ferrules recommended for flexible cables.
. Recommendation :

Check cable clamps
Order by diagram
Against.

Torque: 6 Nm.

### 3.3 Enclosures - Recommendations:

. For photovoltaic applications, mount in enclosures approved for use up to 1000 V DC.

## Restriction:

. Do not mount in Plexo ${ }^{3}$ enclosures with 1 row of 12 or 18 modules.

## Recommendations

. For Plexo ${ }^{3}$ enclosures with 2 or more rows, switches can be mounted in the first row by turning the switch round and feeding the power supply in at the bottom (see § 3.1). In this case, turn around the transparent cover plate using the 2 screws as shown in the diagram below.

## 4. CONFORMITY

## 4. CONFORMITY WITH STANDARDS

. Reference standards: EN 60947-3 and IEC/EN 60947-3
. Low Voltage Directive: 2006/95/EC
. Legrand isolating switches can be used in the operating conditions defined in standard IEC/EN 60947.
. The following climatic conditions can affect the performance of the isolating switches: Hot and dry; Cold and dry; Hot and humid; Salt spray.

## 5. TECHNICAL CHARACTERISTICS

### 5.1 Materials

. Casing: Polyamide $960^{\circ} \mathrm{C}$
. Indicator lamp: Polycarbonate $750^{\circ} \mathrm{C}$

### 5.2 Ambient temperatures

. Storage: $-30^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$
. Operation: $-25^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$

Vistop 32, 63 and 125A 1000 V DC isolating switches
5. TECHNICAL CHARACTERISTICS (continued)

5-3 Summary table

| Cat No. | 414281 | 414282 | 414283 |
| :---: | :---: | :---: | :---: |
| Rated current (le) | 32 A | 63 A | 125 A |
| Operating voltage (Ue) | 1000 V DC |  |  |
| Insulation voltage (Ui) | 1000 V min. |  |  |
| Rated short-ime current (1s) (Icw) | 500 A | 800 A | 1500 A |
| Rated short-circuit capacity (lcm) | 500 A | 800 A | 1500 A |
| Utilization category | DC -21B ${ }^{(1)}$ |  |  |
| Protection index | IP 2x B (IP 3x C under faceplate) |  |  |
| Degree of pollution | 2 |  |  |
| Protection against direct and indirect contact | Class II in enclosure or behind screen |  |  |
| Terminals | Cage type |  |  |
| Connection | Flexible copper with cable ends or rigid copper, 4 to $50 \mathrm{~mm}^{2}$ |  |  |

(1) DC - 21B: Infrequent switching operations with on-load opening (isolation) on DC supply.

## 6. ACCESSORIES

## . $022704 \mathrm{NC}+\mathrm{NO}$ contact

.022707 Additional NC + NO auxiliary contact

To be added to 022704 to obtain $2 \mathrm{NC}+2 \mathrm{NO}$
(Class II treatment
with DC and other voltages)

Note: For 027704 \& 0277 07, ensure that AC cables are routed in an insulated conduit (ICT sleeve) or that double insulated cable is used.

Associated technical data sheets are available.
.022798 Set of two separable sealable terminal shields

## 6. ACCESSORIES (continued)

## . 022722 Auxiliary 2-pole 16 A 400V isolating switch

 Cage terminals

Width: 1.5 modules. To create a 4-pole 32, 63, 125 A unit and 2-pole unit in 16 A 400 V on an AC or (if $U<48 \mathrm{~V}$ DC) DC supply.

Note: To ensure class II treatment, make sure that AC cables are routed in an insulated conduit (e.g. ICT sleeve) or that double insulated cable is used.

## .022732 Extemal front handle

Kit comprising: Connecting rod; Bracket; Self-adhesive drilling template; Fixing accessories with IP55 seal; Locking device preventing door opening with a closed circuit. Distance between door and Vistop switch: 35 to 470 mm .

## . 022797 Padlock supplied with 2 keys

Shackle $\varnothing 6 \mathrm{~mm}$
(Combination of different keys
for each padlock)
